Iron and Steel Engineer Index For 1933

The Association of Iron and Steel Electrical Engineers presents to its membership and the Iron and Steel Industry, through its papers and editorial committee, an index of both the subjects and authors of the papers that have been presented before the five different sections, and printed in the Iron and Steel Engineer, for the year 1933. This index, together with the one printed in the January, 1932 issue of the Iron and Steel Engineer and the January, 1933 issue, is a complete list of all the names of the authors and subjects of the papers presented before the Association in the last twenty-seven years.

LIST OF AUTHORS

A

Abbott, Charles F., New Uses For Steel. August 1933—211.
Arlen, Peter, When Electric Lights Came to Youngstown. September, 1933—254.

B

Badger, A. C., Inspection of Hoisting Chains. November, 1933—316.
Badlam, Stephen, Recent Developments in the Rolling of Sheets and Strip. December, 1933—333.
Ball, H. W., Spoilage of Material Due to Grease and Oil Dripping From Electric Overhead Traveling Cranes and Runways. February, 1933—54.
Barish, T., Economies Effected By the Use of Anti-Friction Bearings in Connection With Mill Type and General Purpose Motors. July, 1933—177.
Beers, L. R., Spoilage of Material Due to Grease and Oil Dripping From Electric Overhead Traveling Cranes and Runways. February, 1933—57.
Brenholts, H. F., Economies Effected By the Use of Anti-Friction Bearings in Connection With Mill Type and General Motors. July, 1933—179.
Brewer, A. F., and E. A. Harper, Spoilage of Material Due to Grease and Oil Dripping From Electric Overhead Traveling Cranes and Runways. . February, 1933—43.
Burr, W. H., Employees' Suggestion Plans. April, 1933—113. Developments in the Iron and Steel Industry, 1932-33. October, 1933—261.

C

Candee, A. H., Diesel Electric Locomotives. June, 1933—151.
Carpenter, H. C. H., and J. M. Robertson, Structural Changes in Hypo-Eutectoid Steels on Heating. July, 1933—192.
Cleary, E. C., Spoilage of Material Due to Grease and Oil Dripping From Electric Overhead Traveling Cranes and Runways. February, 1933—41.
Conway, Martin J., Utilization Research and Economies in the Use of Fuel. August, 1933—217.
Conway, M. J., Industrial Progress. January, 1933—18.
Coffin, L. F., Spoilage of Material Due to Grease and Oil Dripping From Electric Overhead Traveling Cranes and Runways. February, 1933—56. Non-Metallic Bearings. April, 1933—112.
Cox, S. R., Jr., Equipment and Methods Used to Protect Anti-Friction Bearings From Scale, Water, Mill Dust and Heat in Connection With Roll Tables, Ingot Cars, Mixers, Hot Metal Cars and Cranes. July, 1933—171.

D

Davis, A. F., Rebuilding Mill Costs Reduced by the Use of Arc Welding. January, 1933—1.
Detwiler, W. F., The Allegheny Steel Company. October, 1933—XV.
Downing, H. M., Welding By the Shielded Arc Process. November, 1933—318.
Dreyer, A. J., Spoilage of Material Due to Grease and Oil Dripping From Electric Overhead Traveling Cranes and Runways. February, 1933—46.
Duby, C. J., Spoilage of Material Due to Grease and Oil Dripping From Electric Overhead Traveling Cranes and Runways. February, 1933—38.

E

Ebelhare, G. A., Composition Bearings. June, 1933—155.

F

Farrington, James, Spoilage of Material Due to Grease and Oil Dripping From Electric Overhead Traveling Cranes and Runways. February, 1933—45.
Farrington, James, and F. S. Miller, Sheet Sorting Machine. June, 1933—147.
Foss, Feodore F., Which Phase of Steel-Making Process is Most Responsible for the Quality of Steel Products? October, 1933—X.

G

Gainsborg, E. C., Equipment and Methods Used to Protect Anti-Friction Bearings From Mill Dust and Heat in Connection With Ladle Cranes, Charges and Soaking Pit Cranes. July, 1933—175.
Gibson, A. E., Welding and the Steel Industry. October, 1933—270.
Gillies, F. M., Safety in the Steel Industry. November, 1933—320.
Glauch, E. S., Spoilage of Material Due to Grease and Oil Dripping From Electric Overhead Traveling Cranes and Runways. February, 1933—53.

Equipment and Methods Necessary to Maintain Anti-Friction Bearings Applied to Roll Necks. July, 1933—168.

LIST OF SUBJECTS

A

Accomplished by a Progressive Sister Society—Results—By John F. Kelly. July, 1933—183.
Act—The Future of Industry Under the National Recovery—By George M. Verity. July, 1933—III.
Advances in Resistance Welding Made Possible With Thyratron Control—By W. C. Hutchins. March, 1933—87.
Affect Operation of Direct Current Machines—Design Characteristics That—By Max Hartenheim. April, 1933—109.
Air Conditioning Equipment for Rolling Mill Motors—By C. J. Smith. June, 1933—141.
A. I. & S. E. E. Convention and Exposition—By W. E. Miller. October, 1933—IX.
Allegheny Steel Company—The—By W. F. Detwiler. October, 1933—XV.
Alternating Current and Direct Current Welding—New Developments in—By W. C. Pearson. August, 1933—209.
Alumina and Magnesia—Boiler Water Conditioning With—By W. F. Peters, Jr. May, 1933—118.
American Sheet and Tin Plate Company, Vandergrift Works—By Julius Graf. October, 1933—XIV.
Annealing Strip and Sheets—Electric Furnaces for—By A. N. Otis. October, 1933—277.
Anti-Friction Bearings Applied to Roll Necks—Equipment and Methods Necessary to Maintain—By John L. Young. July, 1933—168.
Anti-Friction Bearings From Mill Dust and Heat in Connection With Ladle Cranes, Chargers and Soaking Pit Cranes—Equipment and Methods Used to Protect—By E. C. Gainsborg. July, 1933—175.
Anti-Friction Bearings from Scale, Water, Mill Dust and Heat in Connection With Roll Tables, Ingot Cars, Mixers, Hot Metal Cars and Cranes—Equipment and Methods Used to Protect—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.
Anti-Friction Bearings in Connection With Mill Type and General Purpose Motors—Economies Effected by the Use of—By T. Barish and H. F. Brenholts. July, 1933—177.
Anti-Friction Bearings in the Iron and Steel Industry—Progress of—By John L. .Young. January, 1933—22.
Anti-Friction Bearings to Roll Necks of Steel Rolling Mills—Tabulations of Applications of. October, 1933—291.
Applications of Anti-Friction Bearings to Roll Necks of Steel Rolling Mills—Tabulations of. October, 1933—291.
Application of Resistors for Direct Current Motors—Practical Design and—By Don L. Orton. September, 1933—229. November, 1933—312.
Application of the Synchronous Tie to Modern Control Problems—The—By R. H. Wright. May, 1933—123.
Application of the Tool Called Electric Welding—Encouraging the Uses for Steel with the. April, 1933—113.
Applied to Roll Necks—Equipment and Methods Necessary to Maintain Anti-Friction Bearings—By John L. Young. July, 1933—168.
Arc Process—Welding by the Shielded—By H. M. Downing. November, 1933—318.
Arc Welding Industry—Growth of the Electric—By E. A. Hurme. October, 1933—279.
Arc Welding of Stainless Steels—By E. A. Hurme. July, 1933—193.
Arc Welding—Rebuilding Mill Costs Reduced by the Use of—By A. F. Davis. January, 1933—1.

B

Bearings Applied to Roll Necks—Equipment and Methods Necessary to Maintain Anti-Friction—By John L. Young. July, 1933—168.
Bearings—Composition—By G. A. Ebelhare. June, 1933—155.
Bearings From Mill Dust and Heat in Connection With Ladle Cranes, Chargers and Soaking Pit Cranes—Equipment and Methods Used to Protect Anti-Friction—By E. C. Gainsborg. July, 1933—175.
Bearings from Scale, Water, Mill Dust and Heat in Connection With Roll Tables, Ingot Cars, Mixers, Hot Metal Cars and Cranes—Equipment and Methods Used to Protect Anti-Friction—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.
Bearings in Connection With Mill Type and General Purpose Motors—Economies Effected by the Use of Anti-Friction—By T. Barish and H. F. Brenholts. July, 1933—177.
Bearings in the Iron and Steel Industry—Progress of Anti-Friction—By John L. Young. January, 1933—22.
Bearings to Roll Necks of Steel Rolling Mills—Tabulations of Applications of Anti-Friction. October, 1933—291.
Bill—The National Industrial Recovery—By Robert P. Lamont. June, 1933—160.
Blast Furnace—The External Heat Loss of a—By D. F. Marshall. May, 1933—136.
Blast Furnace Statistics. July, 1933—197.
Blast Furnaces—Slow Blowing—By W. A. Haven. May, 1933—133.
Blowing Blast Furnaces—Slow—By W. A. Haven. May, 1933—133.
Boiler Water Conditioning With Alumina and Magnesia—By W. F. Peters, Jr. May, 1933—118.

C

Called Electric Welding—Encouraging the Uses for Steel With the Application of the Tool. April, 1933—113.
Cars and Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings from Scale, Water, Mill Dust and Heat in Connection With Roll Tables, Ingot Cars, Mixers, Hot Metal—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.
Cars, Mixers, Hot Metal Cars and Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings from Scale, Water, Mill Dust and Heat in Connection With Roll Tables, Ingot—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.
Chains—Inspection of Hoisting—By A. C. Badger. November, 1933—316.
Changes in Hypo-Eutectoid Steels on Heating—Structural—By H. C. H. Carpenter and M. Robertson. July, 1933—192.
Characteristics That Affect Operation of Direct Current Machines—Design—By Max Hartenheim. April, 1933—109.
Chargers and Soaking Pit Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Mill Dust and Heat in Connection With Ladle Cranes—By E. C. Gainsborg. July, 1933—175.
Code of Fair Competition of the Iron and Steel Industry. September, 1933—239.
Cold Rolling Practices—By Lloyd Jones. August, 1933—199.
Cold Rolling—Single Stand Mills—Continuous Mills—Hot Rolling—By A. P. Steckel. January, 1933—3.
Combustion—Diffusion—By G. R. McDermott. January, 1933—19.
Competition of the Iron and Steel Industry—Code of Fair. September, 1933—239.
Composition Bearings—By G. A. Ebelhare. June, 1933—155.
Conditioning Equipment for Rolling Mill Motors—Air—By C. J. Smith. June, 1933—141.
Conditioning With Alumina and Magnesia—Boiler Water—By W. F. Peters, Jr. May, 1933—118.
Considerations in the Selection of Continuous Mill Drives—Some—By A. F. Kenyon. July, 1933—184.
Construction—The Use of Rolled Steel in Machine—By H. G. Marsh. June, 1933—162.
Construction—Welded Steel—By Lloyd Jones. December, 1933—369.
Continuous Mill Drives—Some Considerations in the Selection of—By A. F. Kenyon. July, 1933—184.
Continuous Mills—Hot Rolling—Cold Rolling—Single Stand Mills—By A. P. Steckel. January, 1933—3.
Control—Advances in Resistance Welding Made Possible With Thyratron—By W. C. Hutchins. March, 1933—87.
Control Problems—Rod Mill—By G. O. Van Artsdalen. June, 1933—149.
Control Problems—The Application of the Synchronous Tie to Modern—By R. H. Wright. May, 1933—123.
Controlling Screwdown Drafts to the Exact Specifications of the Mill Superintendent—By D. C. Wright. December, 1933—362.
Convention and Exposition—A. I. & S. E. E.—By W. E. Miller. October, 1933—IX.
Co-operation—A National Necessity—By George M. Verity. September, 1933—238.
Costs Reduced by the Use of Arc Welding—Rebuilding Mill—By A. F. Davis. January, 1933—1.

Cranes and Runways—Symposium on Spoilage of Material Due to Grease and Oil Dripping From Electric Overhead Traveling—By C. J. Duby, R. J. Harry, E. C. Cleary, W. C. Heinle, A. F. Brewer, E. A. Harper, H. S. Griffith, James Farrington, Maurice Reswick, A. J. Dreyer, John L. Young, S. A. Newman, B. Hantman, A. J. Jennings, G. W. Miller, H. E. Reynolds, R. G. Schenck, E. S. Glauch, H. W. Ball, T. Seddinger, Philip King, F. C. Hallmark, O. L. Maag, L. F. Coffin, E. C. Kirkpatrick, L. R. Beers, W. E. Smith, W. P. Sheehy, W. D. Hodson and J. A. Voss. February, 1933—37.

Cranes, Chargers and Soaking Pit Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Mill Dust and Heat in Connection With Ladle—By E. C. Gainsborg. July, 1933—175.

Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Mill Dust and Heat in Connection With Ladle Cranes, Chargers and Soaking Pit—By E. C. Gainsborg. July, 1933—175.

Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Scale, Water, Mill Dust and Heat in Connection With Roll Tables, Ingot Cars, Mixers, Hot Metal Cars and—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.

D

Design and Application of Resistors for Direct Current Motors—Practical—By Don L. Orton. September, 1933—229. November, 1933—312.

Design Characteristics That Affect Operation of Direct Current Machines—By Max Hartenheim. April, 1933—109.

Developments in Alternating Current and Direct Current Welding—New—By W. C. Pearson. August, 1933—209.

Developments in Electrical Equipment for Steel Mills—By H. A. Winne. January, 1933—20.

Developments in the Iron and Steel Industry, 1932-1933—By W. H. Burr. October, 1933—261.

Developments in the Rolling of Sheets and Strip—Recent—By Stephen Badlam. December, 1933—333.

Developments in the Steel Industry—Engineering—By J. S. Tritle. October, 1933—XVI.

Diesel Electric Locomotives—By A. H. Candee. June, 1933—151.

Diffusion Combustion—By G. R. McDermott. January, 1933—19.

Dimensions By the Use of Electricity—Precision Measurements of Mechanical—By S. B. Terry. February, 1933—33.

Direct Current Machines—Design Characteristics That Affect Operation of—By Max Hartenheim. April, 1933—109.

Direct Current Motors—Practical Design and Application of Resistors for—By Don L. Orton. September, 1933—229. November, 1933—312.

Direct Current Welding—New Developments in Alternating Current and—By W. C. Pearson. August, 1933—209.

Drafts to the Exact Specifications of the Mill Superintendent—Controlling Screwdown—By D. C. Wright. December, 1933—362.

Dripping From Electric Overhead Traveling Cranes and Runways—Symposium on Spoilage of Material Due to Grease and Oil—By C. J. Duby, R. J. Harry, E. C. Cleary, W. C. Heinle, A. F. Brewer, E. A. Harper, H. S. Griffith, James Farrington, Maurice Reswick, A. J. Dreyer, John L. Young, S. A. Newman, B. Hantman, A. J. Jennings, G. W. Miller, H. E. Reynolds, R. G. Schenck, E. S. Glauch, H. W. Ball, T. Seddinger, Philip King, F. C. Hallmark, O. L. Maag, L. F. Coffin, E. C. Kirkpatrick, L. R. Beers, W. E. Smith, W. P. Sheehy, W. D. Hodson and J. A. Voss. February, 1933—37.

Drive Statistics—1932—Main Roll. January, 1933—23.

Drives—Some Considerations in the Selection of Continuous Mill—By A. F. Kenyon. July, 1933—184.

Due to Grease and Oil Dripping From Electric Overhead Traveling Cranes and Runways—Symposium on Spoilage of Material—By C. J. Duby, R. J. Harry, H. S. Griffith, A. F. Brewer, E. A. Harper, James Farrington, Maurice Reswick, E. C. Cleary, A. J. Dreyer, S. A. Newman, John L. Young, B. Hantman, A. J. Jennings, G. W. Miller, H. E. Reynolds, R. G. Schenck, E. S. Glauch, H. W. Ball, T. Seddinger, Philip King, F. C. Hallmark, O. L. Maag, L. F. Coffin, E. C. Kirkpatrick, L. R. Beers, W. E. Smith, W. P. Sheehy, W. D. Hodson and J. A. Voss. February, 1933—37.

Dust and Heat in Connection With Ladle Cranes, Chargers and Soaking Pit Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Mill—By E. C. Gainsborg. July, 1933—175.

Dust and Heat in Connection With Roll Tables, Ingot Cars, Mixers, Hot Metal Cars and Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Scale, Water, Mill—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.

E

Economies Effected by the Use of Anti-Friction Bearings in Connection With Mill Type and General Purpose Motors—By T. Barish and H. F. Brenholts. July, 1933—177.

Economies in the Use of Fuels—Utilization, Research and—By Martin J. Conway. August, 1933—217.

Economy—Steel Mill Lubrication—Its Relation to Safety and—By E. A. Harper. September, 1933—235.

Effected by the Use of Anti-Friction Bearings in Connection With Mill Type and General Purpose Motors—Economies—By T. Barish and H. F. Brenholts. July, 1933—177.

Electric—Arc Welding Industry—Growth of the—By E. A. Hurme. October, 1933—279.

Electric Lights Came to Youngstown—When—By Peter Arlen. September, 1933—254.

Electric Locomotives—Diesel—By A. H. Candee. June, 1933—151.

Electric Overhead Traveling Cranes and Runways—Symposium on Spoilage of Material Due to Grease and Oil Dripping From—By C. J. Duby, R. J. Harry, E. C. Cleary, W. C. Heinle, A. F. Brewer, E. A. Harper, H. S. Griffith, James Farrington, Maurice Reswick, A. J. Dreyer, John L. Young, S. A. Newman, B. Hantman, A. J. Jennings, G. W. Miller, H. E. Reynolds, R. G. Schenck, E. S. Glauch, H. W. Ball, T. Seddinger, Philip King, F. C. Hallmark, O. L. Maag, L. F. Coffin, E. C. Kirkpatrick, L. R. Beers, W. E. Smith, W. P. Sheehy, W. D. Hodson and J. A. Voss. February, 1933—37.

Engineer—The Future of the Iron and Steel—By George M. Verity. October, 1933—XIV.

Engineering Developments in the Steel Industry—By J. S. Tritle. October, 1933—XVI.

Equipment and Methods Necessary to Maintain Anti-Friction Bearings Applied to Roll Necks—By John L. Young. July, 1933—168.

Equipment and Methods Used to Protect Anti-Friction Bearings From Mill Dust and Heat in Connection With Ladle Cranes, Chargers and Soaking Pit Cranes—By E. C. Gainsborg. July, 1933—175.

Equipment and Methods Used to Protect Anti-Friction Bearings From Scale, Water, Mill Dust and Heat in Connection With Roll Tables, Ingot Cars, Mixers, Hot Metal Cars and Cranes—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.

Equipment for Rolling Mill Motors—Air Conditioning—By C. J. Smith. June, 1933—141.

Equipment for Steckel Mills—Electrical—By F. Mohler. January, 1933—8.

Equipment for Steel Mills—Developments in Electrical—By H. A. Winne. January, 1933—20.

Eutectoid Steels on Heating—Structural Changes in Hypo—By H. C. H. Carpenter and M. Robertson. July, 1933—192.
Exact Specifications of the Mill Superintendent—Controlling Screwdown Drafts—By D. C. Wright. December, 1933—362.
Exposition—A. I. & S. E. E. Convention and—By W. E. Miller. October, 1933—IX.
External Heat Loss of a Blast Furnace—The—By D. F. Marshall. May, 1933—136.

F

Fair Competition of the Iron and Steel Industry—Code of. September, 1933—239.
Fifteen Years of Employee Representation—By E. G. Grace. October, 1933—297.
Fuels—Utilization, Research and Economies in the Use of—By Martin J. Conway. August, 1933—217.
Furnace—The External Heat Loss of a Blast—By D. F. Marshall. May, 1933—136.
Furnaces—Slow Blowing Blast—By W. A. Haven. May, 1933—133.
Future of Industry Under the National Recovery Act—The—By George M. Verity. July, 1933—111.
Future of The Iron and Steel Engineer—The—By George M. Verity. October, 1933—XIV.
Future—The Steel Industry and Its—By Charles M. Schwab. July, 1933—157.

G

Gear Sets in Connection With Main Drive Mill Motors—Reduction—By Austin Kuhns. November, 1933—301.
General Purpose Motors—Economies Effected by the Use of Anti-Friction Bearings in Connection With Mill Type and—By T. Barish and H. F. Brenholts. July, 1933—177.
Grease and Oil Dripping From Electric Overhead Traveling Cranes and Runways—Symposium on Spoilage of Material Due to—By C. J. Duby, R. J. Harry, E. C. Cleary, W. C. Heinle, A. F. Brewer, E. A. Harper, H. S. Griffith, James Farrington, Maurice Reswick, A. J. Dreyer, John L. Young, S. A. Newman, B. Hantman, A. J. Jennings, G. W. Miller, H. E. Reynolds, R. G. Schenck, E. S. Glauch, H. W. Ball, T. Seddinger, Philip King, F. C. Hallmark, O. L. Maag, L. F. Coffin, E. C. Kirkpatrick, L. R. Beers, W. E. Smith, W. P. Sheehy, W. D. Hodson and J. A. Voss. February, 1933—37.
Greatest Problem—The Steel Industry's—By John F. Kelly. January, 1933—III.
Growth of the Electric Arc Welding Industry—By E. A. Hurme. October, 1933—279.

H

Heat in Connection With Ladle Cranes, Chargers and Soaking Pit Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Mill Dust and—By E. C. Gainsborg. July, 1933—175.
Heat in Connection With Roll Tables, Ingot Cars, Mixers, Hot Metal Cars and Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Scale, Water, Mill Dust and—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.
Heat Loss of a Blast Furnace—The External—By D. F. Marshall. May, 1933—136.
Heating Solids—Practical Methods for Inductively—By Dr. E. F. Northrup. March, 1933—67.
Heating—Structural Changes in Hypo-Eutectoid Steels on—By H. C. H. Carpenter and J. M. Robertson. July, 1933—192.
High Managanese Steel Welding—By E. A. Hurme. August, 1933—213.
Hoisting Chains—Inspection of—By A. C. Badger. November, 1933—316.
Hot Metal Cars and Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Scale, Water, Mill Dust and Heat in Connection With Roll Tables, Ingot Cars, Mixers—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.
Hot—Rolling—Cold Rolling—Single Stand Mills—Continuous Mills—By A. P. Steckel. January, 1933—3.
Hypo-Eutectoid Steels on Heating—Structural Changes in—By H. C. H. Carpenter and J. M. Robertson. July, 1933—192.

I

Index for 1932—Iron and Steel Engineer. January, 1933—24.
Inductively Heating Solids—Practical Methods for—By Dr. E. F. Northrup. March, 1933—67.
Industrial Lighting Problems—By P. R. Holmes. May, 1933—130.
Industrial Plants—Locomotives for Shifting Purposes in—By D. M. Petty. April, 1933—97.
Industrial Progress—By Martin J. Conway. January, 1933—18.
Industrial Recovery Bill—The National—By Robert P. Lamont. June, 1933—160.
Industry and Its Future—The Steel—By Charles M. Schwab. June, 1933—157.
Industry—Code of Fair Competition of the Iron and Steel. September, 1933—239.
Industry—Electric Power and the Steel—By J. D. Wright. October, 1933—XVII.
Industry—Engineering Developments in the Steel—By J. S. Tritle. October, 1933—XVI.
Industry—Growth of the Electric Arc Welding—By E. A. Hurme. October, 1933—279.
Industry Is Thinking About—What the Steel. November, 1933—324.
Industry—Progress of Anti-Friction Bearings in the Iron and Steel—By John L. Young. January, 1933—22.
Industry—Safety in the Steel—By F. M. Gillies. November, 1933—320.
Industry Under the National Recovery Act—The Future of—By George M. Verity. July, 1933—III.
Industry, 1932-1933—Developments in the Iron and Steel—By W. H. Burr. October, 1933—261.
Industry's Greatest Problem—The Steel—By John F. Kelly. January, 1933—III.
Ingot Cars, Mixers, Hot Metal Cars and Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Scale, Water, Mill Dust and Heat in Connection With Roll Tables—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.
Inspection of Hoisting Chains—By A. C. Badger. November, 1933—316.
Iron and Steel Engineer—Index for 1932. January, 1933—24.
Iron and Steel Engineer—The Future of the—By George M. Verity. October, 1933—XIV.
Iron and Steel Industry—Code of Fair Competition of the. September, 1933—239.
Iron and Steel Industry—Progress of Anti-Friction Bearings in the—By John L. Young. January, 1933—22.
Iron and Steel Industry, 1932-1933—Developments in the—By W. H. Burr. October, 1933—261.

L

Ladle Cranes, Chargers and Soaking Pit Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Mill Dust and Heat in Connection With—By E. C. Gainsborg. July, 1933—175.
Lighting Problems—Industrial—By P. R. Holmes. May, 1933—130.
Lights Came to Youngstown—When Electric—By Peter Arlen. September, 1933—254.
Locomotives—Diesel Electric—By A. H. Candee. June, 1933—151.
Locomotives for Shifting Purposes in Industrial Plants—By D. M. Petty. April, 1933—97.
Loss of a Blast Furnace—The External Heat—By D. F. Marshall. May, 1933—136.
Lubrication—Its Relation to Safety and Economy—Steel Mill—By E. A. Harper. September, 1933—235.
Lubrication—Progress—Rolling Mills—Open Hearths—By John F. Kelly. January, 1933—14.

M

Machine Construction—The Use of Rolled Steel in—By H. G. Marsh. June, 1933—162.
Machines—Design Characteristics That Affect Operation of Direct Current—By Max Hartenheim. April, 1933—109.

Machine—Sheet Sorting—By J. Farrington and F. S. Miller. June, 1933—147.
Main Drive Mill Motors—Reduction Gear Sets in Connection with—By Austin Kuhns. November, 1933—301.
Main Roll Drive Statistics, 1932. January, 1933—23.
Maintain Anti-Friction Bearings Applied to Roll Necks—Equipment and Methods Necessary to—By John L. Young. July, 1933—168.
Manganese Steel Welding—High—By E. A. Hurme. August, 1933—213.
Material Due to Grease and Oil Dripping From Electric Overhead Traveling Cranes and Runways—Symposium on Spoilage of—By C. J. Duby, R. J. Harry, E. C. Cleary, W. C. Heinle, H. S. Griffith, A. F. Brewer, E. A. Harper, James Farrington, Maurice Reswick, A. J. Dreyer, S. A. Newman, John L. Young, B. Hantman, A. J. Jennings, G. W. Miller, H. E. Reynolds, R. G. Schenck, E. S. Glauch, H. W. Ball, T. Seddinger, Philip King, F. C. Hallmark, O. L. Maag, L. F. Coffin, E. C. Kirkpatrick, L. R. Beers, W. E. Smith, W. P. Sheehy, W. D. Hodson and J. A. Voss. February, 1933—37.
Measurements of Mechanical Dimensions By the Use of Electricity—Precision—By S. B. Terry. February, 1933—33.
Mechanical Dimensions By the Use of Electricity—Precision Measurements of—By S. B. Terry. February, 1933—33.
Message—The President's—By W. E. Miller. August, 1933—111.
Metal Cars and Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Scale, Water, Mill Dust and Heat in Connection With Roll Tables, Ingot Cars, Mixers, Hot—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.
Methods for Inductively Heating Solids—Practical—By Dr. E. F. Northrup. March, 1933—67.
Methods Necessary to Maintain Anti-Friction Bearings Applied to Roll Necks—Equipment and—By John L. Young. July, 1933—168.
Methods Used to Protect Anti-Friction Bearings From Mill Dust and Heat in Connection With Ladle Cranes, Chargers and Soaking Pit Cranes—Equipment and—By E. C. Gainsborg. July, 1933—175.
Methods Used to Protect Anti-Friction Bearings From Scale, Water, Mill Dust and Heat in Connection With Roll Tables, Ingot Cars, Mixers, Hot Metal Cars and Cranes—Equipment and—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.
Mill Control Problems—Rod—By G. O. Van Artsdalen. June, 1933—149.
Mill Costs Reduced by the Use of Arc Welding—Rebuilding—By A. F. Davis. January, 1933—1.
Mill Drives—Some Considerations in the Selection of Continuous—By A. F. Kenyon. July, 1933—184.
Mill Dust and Heat in Connection With Ladle Cranes, Chargers and Soaking Pit Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From—By E. C. Gainsborg. July, 1933—175.
Mill Dust and Heat in Connection With Roll Tables, Ingot Cars, Mixers, Hot Metal Cars and Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Scale, Water—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.
Mill Lubrication—Its Relation to Safety and Economy—Steel—By E. A. Harper. September, 1933—235.
Mill Motors—Air Conditioning Equipment for Rolling—By C. J. Smith. June, 1933—141.
Mill Motors—Reduction Gear Sets in Connection With Main Drive—By Austin Kuhns. November, 1933—301.
Mill—Superintendent—Controlling Screwdown Drafts to the Exact Specifications of the—By D. C. Wright. December, 1933—362.
Mill Type and General Purpose Motors—Economies Effected by the Use of Anti-Friction Bearings in Connection With—By T. Barish and H. F. Brenholts. July, 1933—177.
Mills—Continuous Mills—Hot Rolling—Cold Rolling—Single Stand—By A. P. Steckel. January, 1933—3.
Mills—Developments in Electrical Equipment for Steel—By H. A. Winne. January, 1933—20.
Mills—Electrical Equipment for Steckel—By F. Mohler. January, 1933—8.
Mills—Hot Rolling—Cold Rolling—Single Stand Mills—Continuous—By A. P. Steckel. January, 1933—3.
Mills—Open Hearths—Lubrication—Progress—Rolling—By John F. Kelly. January, 1933—14.
Mills—Tabulations of Applications of Anti-Friction Bearings to Roll Necks of Steel Rolling. October, 1933—291.
Mixers, Hot Metal Cars and Cranes—Equipment and Methods Used to Protect Anti-Friction Bearings From Scale, Water, Mill Dust and Heat in Connection With Roll Tables, Ingot Cars—By S. R. Cox, Jr., and V. A. Menaglia. July, 1933—171.
Modern Control Problems—The Application of the Synchronous Tie to—By R. H. Wright. May 1933—123.
Motors—Air Conditioning Equipment for Rolling Mill—By C. J. Smith. June, 1933—141.
Motors—Economies Effected by the Use of Anti-Friction Bearings in Connection with Mill Type and General Purpose—By T. Barish and H. F. Brenholts. July, 1933—177.
Motors—Practical Design and Application of Resistors for Direct Current—By Don L. Orton. September, 1933—229, November, 1933—312.
Motors—Reduction Gear Sets in Connection with Main Drive Mill—By Austin Kuhns. November, 1933—301.

N

National Industrial Recovery Bill—The—By Robert P. Lamont. June, 1933—160.
National Necessity—Co-Operation—A—By George M. Verity. September, 1933—238.

ITEMS OF INTEREST

PERSONNEL CHANGES

C. A. Kral, formerly superintendent of the Blooming Mills, Bar and Hot Strip Mills, has been appointed assistant general manager of the Steubenville, Ohio plant of the Wheeling Steel Corporation.

C. A. KRAL.

Mr. Kral is an active member of the Association of Iron and Steel Electrical Engineers and is at the present time serving on the Association's National Committee devoted to Developments in Rolling Mill Practices.

The membership of the Association extends to Mr. Kral their congratulations on his elevation to his new capacity and wishes him continued success.

F. H. Dyke, formerly assistant superintendent of the Blooming Mills, Bar and Hot Strip Mills of the Steubenville, Ohio plant has been appointed superintendent, succeeding Mr. C. A. Kral.

C. M. Thompson, formerly products engineer in charge of the Carboloy and Circular Saw Divisions of the Henry Disston & Sons, Inc., Philadelphia, has been transferred to the Sales Department in charge of Metal Saw and Carboloy sales.

Mr. Thompson graduated in 1915 from the Mechanical Engineering Department of the University

C. M. THOMPSON, JR.

of Pennsylvania. He entered the employ of the Philadelphia Electric Company. Served in the World War and was discharged in April 1919 and returned to the employ of the Philadelphia Electric Company.

In April 1920 he entered the employ of the Henry Disston & Sons, Inc., in the Engineering Department. In November, 1924 he was promoted to plant engineer and served in this capacity until August, 1929. Then he was transferred to Production department in charge of the Carboloy and Circular Saw Divisions, from there to his present new position in the sales department.
